## PARACHUTE ROYAL WULFF

This is one of the best attracters around. On moving water, fish it on a dead draft. On still water twitch it around a little.

Hook: TMC 100 or equivalent size 12 - 18  
Thread: 6/0 Black  
Tail: Moose Body Hair  
Wing: White Poly Yarn  
Hackle: Brown  
Body: Peacock Herl, Red Thread or Floss

If you are not using a barbless hook, crush the barb now.

Start the thread one eyes length back from the eye of the hook, wrap back to the bend of the hook.

Cut a clump of Moose Body Hair and stack the hair to even the tips. Measure the tail material to one hook shank length and tie in at the bend. Trim the excess tail material. Return the thread to just short of the starting point.

Tie in a piece of poly yarn to form a post. Tie in the hackle feather (dull side facing the post) and post the wing and hackle together. Wrap the thread back to the bend of the hook.

Tie in three or four peacock herls and marry to the thread. Wrap forward to the post and take one wrap past the post and tie off and trim.

Take a length of red thread or floss, tie in at the center point of the body and trim the tag. Create a red segment around the body about 1/3 the size of the body length. Tie off, trim the thread or floss and secure with a drop of head cement.

Wrap the hackle around the post three or four times, tie off and trim. Form the head and whip finish.

Trim the post.
